

MenuStrip UI text to menu Guide

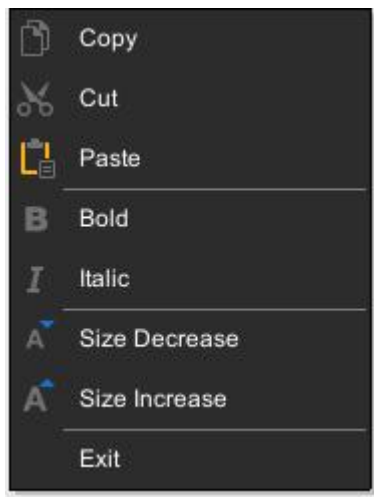

MenuStrip UI uses text to save the structure of the menu, After familiarizing yourself with the rules, you can easily and quickly add menu items

One line of text is a menu item, Menu content separated by commas.

View the example below:

```
Copy, Icons/Copy_20x20
Cut, Icons/Cut_20x20
Paste, Icons/Paste_20x20, split
Bold, Icons/Bold_20x20
Italic, Icons/Italic_20x20, split
Size Decrease, Icons/FontSizeDecrease_20x20
Size Increase, Icons/FontSizeIncrease_20x20, split
Exit
```

The red box shows the text of the menu

Other contents are menu parameters

Parameters

The parameters are:

[TAB]: Create submenu

Bold: Bold the text

Split: Add a split line under the menu item

Disable: The menu item is in a disable state

Icon: Specify the icon to use for the menu item, which needs to be placed in the resources/icons directory

Shortcut: Supports combination of shortcut keys

Alt+[letter]
Ctrl+[letter]
Shift+[letter]
Ctrl+Alt+[letter]
Ctrl+Shift+[letter]

For example:

Create an open file menu item with an icon and CTRL+O

Open file,CTRL+O,Icons/Open_20x20

Create submenu

When you want to create a submenu, you need to add [TAB] before the menu text. For several levels of menus, you need to add a few [TAB]

Secondary Menu:

File
 FileChild1
 FileChild2

Third level menu:

File
 FileChild1
 FileChild1-1
 FileChild1-2
 FileChild2

Among them, FileChild1 and FileChild2 is the secondary level menu
FileChild1-1 and FileChild1-2 is the tertiary level menu!
