MenuStrip UI Version: V1.0

http://www.maything.com

Thank you very much for purchasing this package.

This guide will tell you how to use MenuStrip UI!

What is MenuStrip UI?

The Menu Strip UI is developed based on the Unity GUI, providing pop-up menus, menu bars, menu event management components, and 9 different styles of themes.

Through these components, you can quickly build menus similar to Windows or Visual Studio styles without writing code
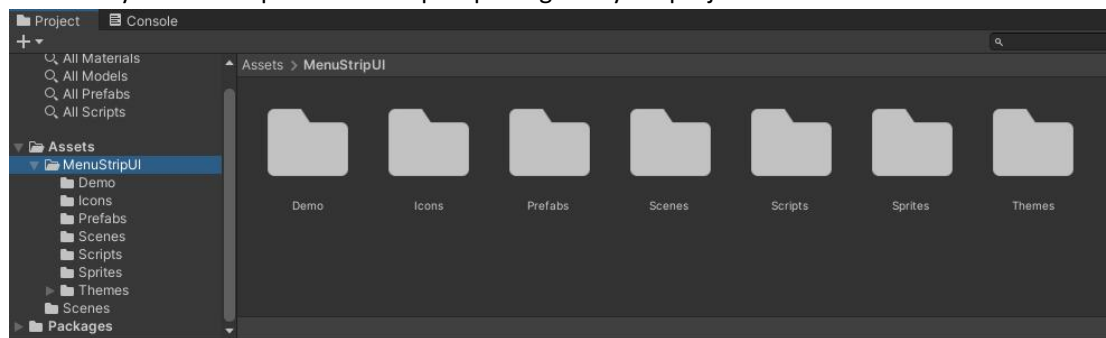

In addition to using existing themes, you can create personalized menu themes!

If you need to use menus in your Unity project, then the The Menu Strip UI component is your best choice!

The MenuStrip UI consists of a pop-up menu, menu bar, and menu event manager
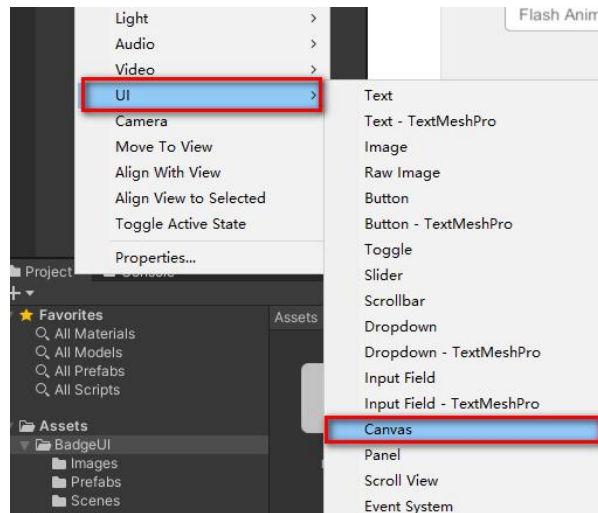

Import MenuStrip UI Package

First you need import MenuStrip UI package for your project!You can see:

And now you can useMenuStrip UI!
